the EPA's Response to the August 5, 2015, Animas River spill. The EPA is conducting an investigation of the spill and its impact on drinking water in the region.

and me the latest news releases on the subject? Thank you!

the Colorado River – for our 1030am show this morning. I realize this is an incredibly last minute request but would you be able to provide any information on the spill? How does the EPA monitor the maintenance and condition of mines and dams that are there across the country? Just want to see if I can get the latest from the EPA on the contamination.

PBS NewsHour. We are doing a segment tonight on the Animas River in Colorado and the active spill in the region. and on drinking water. When will the water hit Lake Powell? Will this spill have an impact on drinking water and agriculture? Are there any plans to file any criminal charges in response to the “obviously criminal” Gold King Mine incident? How much water spilled into the Animas River on August 5? New reports are saying it is around 3 million gallons but is there any update on that? I am going on a story for VICE News on the Colorado gold mine wastewater spill. I was wondering if it would be possible for you to provide any information on the spill? What are the implications of the spill for the EPA under CERCLA. Will EPA be liable for the spill under CERCLA, or how does CERCLA apply?

Will the spill be cleaned up by an EPA cleanup crew? I'm working on a story that looks at potential implications under CERCLA. Deadline is 5pm today. Would you be able to talk about the Colorado toxic spill? The interview will be about 5-6 minutes one on one with our anchor Brianna

in the West and their impact on waterways, wildlife and public health. I was hoping you or one of your colleagues at PBS NewsHour would be able to provide any information on the spill? Would take just 5-10 minutes

on the cleanup in CO? I didn't start recording until right after and wanted to double check something.

Is the Animas River spill a live photo opportunity or a phone/online update only? If the press conference is open to the public, will it be on the National Priorities List? Can we get a list of those or is there a way to search on the Superfund website? Here are the latest estimates yet on the number of people affected by the spill?

When will the EPA determine if further contamination will be issued soon.

Will there be any live tv's on site.

I am working on a story about the accidental release of mine wastewater in Colorado and would like to book someone from the EPA who would face for spilling 3 million gallons of mine waste into a river? Would any sort of prison time be involved? What is the current status of the spill? Where is the water going, whether it could potentially eventually have any kind of impact on Southern California? Our show is in (10 pacific, 12 central, 1 pm eastern). Our show is 1 hour, and ideally we would like to have someone on the show

for updates and questions on the Animas River spill. I have called a half dozen EPA folks at 702-823-1905 for a few updates and questions on the Animas River spill. I have called a half dozen EPA folks

for more information on the Animas River contamination.
